

# **WEKRAFT Glazed Vitrified Tile FAQs by MetaXperia Home Solutions**

## **1) What are Glazed Vitrified Tiles (GVT)?**

Glazed Vitrified Tiles (GVT) are a type of ceramic tile made from a dense, vitrified clay body that is glazed and fired at high temperatures. This process creates a strong, durable, and low-porosity tile that is resistant to staining, scratches, and chemicals.

## **2) What are Polished Glazed Vitrified Tiles (PGVT)?**

Polished Glazed Vitrified Tiles (PGVT) are a type of GVT that has been polished to a high shine. This creates a smooth, reflective surface that is easy to clean and maintain. PGVTs are ideal for areas where a high-end, luxurious look is desired.

## **3) What are Large Format Glazed Vitrified Tiles (LFT-GVT)?**

Large Format Glazed Vitrified Tiles (LFT-GVT) are GVTs that come in sizes larger than traditional tiles. These tiles can create a seamless look in a space and reduce the number of grout lines, making them easier to clean.

## **4) What are the available sizes?**

GVTs / PGVTs are available in 600MM X 600MM, 600MM X 1200MM, 800MM X 1600MM, 1200MM X 1800MM

## 5) What are available Surface Finish/Textures ?

- **Rustic:** Rustic GVTs have a textured surface that resembles natural stone. They can add a touch of warmth and character to a space.
- **Matt:** Matt GVTs have a low-sheen finish that is less slippery than glossy tiles. They are a good choice for high-traffic areas.
- **Satin Matt:** Satin Matt GVTs have a slightly higher sheen than matt finishes but are still less reflective than glossy tiles.
- **Glossy:** Glossy GVTs have a high-shine finish that reflects light and can make a space feel larger. However, they can also show scratches and dirt more easily.
- **High Gloss:** High Gloss GVTs have an even higher shine than glossy tiles. They are very reflective and can create a dramatic look.

## 6) Where these tiles are used ?

### Usages based on Application

- **Residential:** GVTs are a popular choice for residential flooring and walls due to their durability, ease of maintenance, and wide variety of styles.

- **Commercial:** GVTs are well-suited for commercial applications where high traffic and wear are expected. They are also resistant to stains and chemicals, making them ideal for restaurants, retail stores, and offices.
- **Hospitality:** GVTs can create a luxurious and stylish look in hotels, resorts, and spas. They are also easy to clean and maintain, which is important in high-traffic hospitality environments.
- **Industrial:** GVTs are a good choice for industrial applications where durability and resistance to chemicals are important. They can be used in warehouses, factories, and other industrial settings.

## Special Applications

- **Anti-bacterial and Anti-fungal Tiles:** These tiles are treated with a special antimicrobial agent that helps to inhibit the growth of bacteria and fungi. They are ideal for use in hospitals, schools, public toilets, and other areas where hygiene is a top priority.

## 7) What Are Other Features and Benefits of WEKRAFT GVTs ?

- **Hygiene:** GVTs are easy to clean and maintain, which helps to promote good hygiene.
- **Grip:** The surface texture of GVTs can provide good grip,

even when wet, reducing the risk of slips and falls.

- **Ease of Maintenance:** GVTs require minimal maintenance. They can be cleaned with a mop and a mild detergent.

## 8) What are Dos and Donts for Choosing WEKRAFT GVTs ?

- **Do** consider the traffic flow in the space when choosing a tile. High-traffic areas will need a more durable tile.
- **Do** think about the style of your space and choose a tile that complements it.
- **Don't** forget to factor in the cost of tiles, installation, and grout when making your decision.
- **Do** ask for samples of the tiles you are interested in so you can see them in person before you buy.

## 9) What Are Precautions While Laying WEKRAFT GVTs ?

- It is important to use a qualified installer to lay your GVTs.
- The subfloor must be properly prepared before the tiles are laid.
- The tiles must be laid with the correct spacing between them.

- The tiles must be sealed after they are laid.

## **10) What is WEKRAFTs GVT / PGVT Sales Policy ?**

- WEKRAFT's policy is that there is no exchange, no refund, and no cancellation allowed once the order is confirmed and materials are procured. This is because custom-made or procured materials cannot be returned.
- All costs to be borne by the customer especially if he wants to exchange unboxed tiles.
